ABUSE. IS CHILD RAPE ABUSE? WHY OR WHY NOT?

NAME ANSWER

PETER I think that it is rather clear that child rape would be considered abuse, but I wouldn't say the opposite, that child abuse is automatically rape.

Zafer: I think this question has two separate concerns in it. Child rape is already a topic alone which is the worst thing someone can do and should not be forgiven. Child abuse is a different topic where the culture gets into consideration. In some cultures, parents or very close family members believe that punishing a child for his/her actions is a way of education and punishment. Which can be discussed on the other hand, in some cultures, child abuse is an abuse which should not be tolerated.

Riervan I do believe child rape is abuse, it can affect a child mentally and physically in a negative way. As they grow older it becomes harder for them to trust others due to the experience of being raped at a young age.

Friday: Child abuse of any kind should be under as abuse no matter what. I believe no child should be under any circumstance like that. Children need to be able to live life without any doubts of what they have had to go through.

THi Yes, I do think child abuse or any kind of that is wrong. It does affect a child's memory and it affects their lives not only in the past but also when they are already grown up.

Tabor

yes, & it inflicts lasting psychological harm to the child in question on top of the physical damage sustained during the act. Child can be defined as an individual below the age legally determined to be an adult, so the chance of pregnancy resulting from rape could be considered a lasting form of abuse which could result in permanent bodily disfigurement.
